EDUCATION

Army Institute of Technology   Pune , Maharashtra
B.E in Computer Engineering   *Sep 2022 – Present*
- Cumulative GPA : **8.7/10.0**
- Relevant Coursework: Web Technologies, Data Structures and Algorithms , Object Oriented Programming Language , Computer Graphics

WORK EXPERIENCE

Backend Intern   June 2024 - Aug 2024
Adhyatmic   *Remote*
- Optimized API response times by designing and implementing new RESTful APIs using Node.js and Express.
- Developed backend routes to streamline communication with an AI model, ensuring accurate and timely responses for users.

PROJECTS

Unity Docs   *(Try it here)*
- **TechStack:** Socket.io,React Quill, React, Node.js, Express ,MongoDB, Bcrypt
- Developed a real-time collaborative document editing platform using WebSocket and RESTful APIs, enabling multiple users to co-edit documents simultaneously with real-time content synchronization.
- Integrated rich text editing features utilizing React Quill, supporting customizable formatting, version control, and seamless document sharing options.

SnackPay Bot   *(Try it here)*
- **TechStack:** Node.js, Telegraf (Telegram Bot API), Cashfree Payments API, Axios, MongoDB, Webhooks
- Built a Telegram bot using Telegraf for canteen orders, enabling dynamic payment amounts and secure payment links via Cashfree API.
- Integrated MongoDB for persistent order management and tracking, storing user orders and payment details.
- Developed Node.js backend logic with webhooks, REST APIs, and Axios for real-time payment updates and seamless gateway communication.

Git Deployer   *(Try it here)*
- **TechStack:** React (Frontend), Node.js, Express (Backend), Redis (Queue), R2 Object Store (Deployment Storage)

- Created an application that enables seamless deployment of React projects from GitHub repositories via automated processes.
- Utilizes Redis Queue for streamlined handling of deployment tasks, ensuring efficiency with multiple requests.
- Provides users with instant feedback on deployment status and easy access to deployed projects.

TECHNICAL SKILLS

Programming Languages	Python, C/C++, Javascript , Typescript
Database	React,NextJS,Material UI,Chakra UI
Frontend Technologies	Firebase, MongoDB
Backend Technologies	NodeJS, ExpressJS,EJS
Deployment Services	Git,Github,Vercel,Render
Tools	VsCode, Postmon,Atlas,Figma

ACHIEVEMENTS

- Secured **3rd position** in **DSA Craft Hackathon** organized by MKSSS's Cummins College of Engineering for Women, Pune.   .
- Secured **AIR 13** in an Open Source Event **Codepeak 23 from 6000+ Participants , did 35+ Pull Request** on Innumerable Domains of Project
